

THE ULTIMATE 2026

Website Launch Checklist

Don't launch your next project blind. This is the exact 50-point checklist our team runs through on every project before it goes live — covering performance, security, mobile UX, content, QA, and launch day.

WHERE LOGIC MEETS INNOVATION

50

Checklist Items

Prepared and used internally by Logic Intelligence Technologies Pvt. Ltd.

Full-Stack Web, Software & App Development — Coimbatore, India

01 Performance & SEO

- ☐ Images are compressed and served in WebP/AVIF format
- ☐ All meta titles and descriptions are unique and keyword-relevant
- ☐ sitemap.xml and robots.txt are configured and submitted to Search Console
- ☐ Google Analytics (GA4) and Search Console are verified and tracking
- ☐ Core Web Vitals (LCP, INP, CLS) are tested and within "Good" thresholds
- ☐ Semantic HTML structure is used (single H1, logical H2/H3 hierarchy)
- ☐ Page load time is under 3 seconds on 4G mobile
- ☐ Below-the-fold images use lazy loading
- ☐ Canonical tags are set to prevent duplicate content issues
- ☐ Structured data / schema markup is added where relevant

02 Security & Data Privacy

- ☐ SSL certificate is installed and HTTPS is enforced site-wide
- ☐ Forms are protected against spam and bot submissions (reCAPTCHA/honeypot)
- ☐ Privacy Policy and Terms of Service pages are published and linked in the footer
- ☐ Cookie consent banner is active where required (EU/UK visitors)
- ☐ Database endpoints are authenticated and rate-limited
- ☐ Admin and dashboard routes are protected behind authentication
- ☐ Environment variables and API keys are never exposed client-side
- ☐ Automated backups are configured and verified

03 Mobile Responsiveness & UI

- ☐ Navigation works flawlessly on all mobile devices
- ☐ Buttons and touch targets are at least 44×44px
- ☐ Text is readable without zooming on any screen size
- ☐ No horizontal scrolling occurs on any breakpoint
- ☐ Favicon and Apple Touch Icons display correctly
- ☐ Layout is tested on iOS Safari and Android Chrome
- ☐ Forms are usable and don't trigger unwanted zoom on input focus
- ☐ Sticky elements (nav bar, chat widgets) don't overlap content on small screens

04 Content & Accessibility

- ☐ All images have descriptive alt text
- ☐ Color contrast meets WCAG AA standards
- ☐ Body text is legible at a minimum of 16px
- ☐ All page content is proofread for typos and grammar
- ☐ Brand voice and tone are consistent across all pages
- ☐ Contact information (email, phone, address) is accurate everywhere
- ☐ Legal business details (CIN, registered address) are correctly listed
- ☐ Social media links open correctly and point to live profiles

05 Quality Assurance & Testing

- ☐ All internal and external links are tested and working
- ☐ Forms successfully deliver submissions to the correct inbox
- ☐ A custom, helpful 404 error page is in place
- ☐ Cross-browser testing is completed (Chrome, Safari, Firefox, Edge)
- ☐ Cross-device testing is completed (desktop, tablet, mobile)
- ☐ All interactive elements (dropdowns, modals, sliders) function correctly
- ☐ Payment gateway is tested end-to-end in sandbox and live mode
- ☐ Staging environment matches production before go-live

06 Launch Day & Post-Launch

- ☐ DNS records are correctly pointed to the hosting provider
- ☐ Domain propagation is verified from multiple locations
- ☐ Website is submitted to Google Search Console for indexing
- ☐ Uptime monitoring is configured with alerts
- ☐ A post-launch smoke test is completed across all key pages
- ☐ Client is trained on admin panel / CMS usage
- ☐ Support and maintenance window is communicated clearly
- ☐ Launch announcement is scheduled across social channels

BEFORE YOU GO

Ready to launch with confidence?
